

KKK OIL FACTORY

Dedicated Non-GST Billing Station Manual

Operational Guide for Non-Tax Regional Trade, Mandi Cash Settlements & Private Godowns

NON-GST SUBSYSTEM SPECIFICATION

System Subsystem: Dedicated Non-GST Billing Station

Statutory Classification: Exempt Farm-Gate Procurement, Unbranded Loose Oil & Private Godowns

Tax Rate: Strictly 0.0% GST (CGST 0.0, SGST 0.0, IGST 0.0)

Voucher Identifier: Permanent Prefix 'NG-2026-XXXX'

Authorized Access: Super Admin & Super Admin Non-GST

Audited in GSTR-1: No (Completely Segregated from Statutory Tax Returns)

Station Executive Summary & Statutory Firewall

The Non-GST Billing Station is a specialized operational subsystem within the KKK Oil Factory ERP. It is engineered specifically to handle agricultural mandi farm-gate seed purchases directly from unregistered farmers, unbranded loose oil sales at factory gates, and private holding godown inventory without generating statutory GST tax invoices.

Key Operational Safeguards

- Restricted Authorization: Accessible exclusively by Super Admin accounts; hidden from standard billing cashiers.
- Distinct Amber Theme: Color-coded UI (#B45309) and explicit warning banners prevent accidental cross-billing.
- Dual Ledger Architecture: Maintains completely separate customer credit balances for Non-GST trade.
- Private Godown Stock Isolation: Deducts inventory exclusively from Private Godown, preserving Main Godown audit integrity.
- Zero-Tax Calculation: Tax rate is permanently locked to 0.0%; CGST, SGST, and IGST are strictly zero.

1. Non-GST Paths, Screens & Buttons

Non-GST Voucher Creation: /nongst-billing

The primary non-tax billing interface. Features persistent amber alert banner confirming zero-tax status. Header controls include Customer Selector (shows dedicated Non-GST balance), Route, Godown (defaults to Private Godown), Pricing Tier radio (Retail, Semi-Wholesale, Bulk Wholesale), Payment Mode (Cash, Credit, UPI), and Payment Status.

- Item Search: Real-time SKU autocomplete; automatically fetches product specifications.
- Zero-Tax Engine: Gross minus discount equals net amount; GST rate is locked at 0.0%; GST amount is Rs. 0.00.
- Bottom Tabs: Tab 0 captures internal Dispatch Memo, Vehicle Number, and Driver Name. E-Way Bill and E-Invoice tabs are suppressed.
- Action Buttons: 'Save Voucher' (saves NG- voucher, deducts Private Godown, updates non-tax credit), 'Print A4 Delivery Voucher', 'Print Thermal Receipt', 'Clear Form'.

Non-GST Billing History: /nongst-history

Audit ledger of all issued NG- vouchers. Displays Total Vouchers, Non-Tax Turnover, Cash Collections, and Outstanding Non-GST Credit. Features live search and payment status filter chips (All, Paid, Credit, Partial).

- Reprint A4: Re-opens PDF delivery memo preview for printing or digital download.
- Reprint Thermal: Emits duplicate receipt directly to thermal printer.
- Cancel Voucher: Prompts for cancellation reason, restores stock directly to Private Godown, and reverses customer debit.

Non-GST Quick POS Counter: /nongst-counter

High-velocity cash register for walk-in retail buyers purchasing unbranded loose oil or bulk tins without tax invoicing. Features one-tap product buttons, cart quantity steppers, cash tendered calculator, and instant thermal receipt printing.

2. Financial Architecture & Daily SOPs

Dual Customer Ledger Architecture

To prevent statutory tax audit contamination, every customer profile maintains two completely isolated ledgers: the Statutory GST Ledger (invoices V-2026-XX, 5% tax, exported to GSTR-1) and the Private Non-GST Ledger (vouchers NG-2026-XX, 0% tax, internal audit only). Payments received against Non-GST vouchers cannot be cross-settled against GST invoices.

Private Godown Inventory Segregation

Physical inventory is partitioned between Main Godown (tax-audited stock) and Private Godown (unprocessed mandi seeds and loose oil). Saving an NG- voucher deducts stock strictly from Private Godown. Cancelling an NG- voucher returns stock strictly to Private Godown.

NON-GST DELIVERY VOUCHER ISSUANCE SOP

1. Access Station: Sign in as Super Admin; navigate to /nongst-billing.
2. Verify Banner: Confirm amber warning banner is visible at top.
3. Select Buyer: Choose customer; review displayed Non-GST credit balance.
4. Verify Godown: Confirm Godown is set to Private Godown.
5. Add Line Items: Search SKU, enter qty and rate; click '+ Add to Voucher'.
6. Verify Zero Tax: Confirm GST Rate = 0.0% and GST Amount = Rs. 0.00.
7. Dispatch Details: Enter vehicle registration and driver name in bottom tab.
8. Save & Print: Click 'Save Voucher' (generates NG-2026-XXXX); click 'Print A4 Delivery Voucher'.

Mobile App Field Operations & Audit Safeguards

On Android tablets and mobile devices, Super Admins can access /nongst-billing directly via the bottom navigation. Mandi purchasing agents can pair portable 58mm Bluetooth thermal printers to issue delivery receipts in rural collection yards. Mandatory compliance: Never use the Non-GST station for registered B2B dealers claiming GST Input Tax Credit (ITC).
